Comments: I find it incredible that in this day and age animals are still being used as test subjects.

It is even more egregious that they are being used unnecessarily for redundant tests in the cosmetics industry.

It is far past time that laws are passed to ban all animal testing. It is time to stop denigrating the moral level of our society with this this model of exploitive cruelty. There are many superior and more reliable methods of scientific testing available, and to not utilize these methods is inexcusable.

Thank you.
